CareerCompass AI - Lean Canvas

JATIN MAHAVIR SHARMA | Internship ID: IBMUEML004570

SDG 8: Decent Work & Economic Growth
IBM SkillsBuild | TYIT Project

1. PROBLEM

- Graduates in Tier-2/3 cities do not know which career fits their skills.
- They do not know what to learn next - free resources are scattered.
- Weak resumes get rejected and there is no interview practice.
- **Existing alternatives:** paid career counsellors, job portals (listings, not guidance), random YouTube advice, overloaded placement cells.

4. SOLUTION

- Career Matcher: skills + city type + remote option.
- Skill-gap roadmap with weeks and free resources.
- Resume Builder with score and PDF.
- Mock interview with instant feedback.

8. KEY METRICS

- Registered users
- Careers matched
- Average resume-score improvement
- Roadmap completion rate
- Interview sessions; placements reported

3. UNIQUE VALUE PROPOSITION

- **From your skills to a job-ready plan in 5 minutes** - free, personalised to your city, in one place.
- **High-level concept:** 'Google Maps for your career - it shows where you are, where to go and the route.'

9. UNFAIR ADVANTAGE

- India-specific dataset: tier-wise job availability, LPA ranges, free Indian courses (NPTEL etc.).
- Transparent scoring - users see why.
- College placement-cell partnerships.

5. CHANNELS

- College placement cells & workshops
- LinkedIn, Instagram, YouTube Shorts
- WhatsApp study groups
- Skilling partners (IBM SkillsBuild, NSDC)

2. CUSTOMER SEGMENTS

- Final-year students and fresh graduates, especially Tier-2/3.
- Career switchers and job seekers without access to counselling.
- Colleges and training institutes (placement cells).
- **Early adopters:** TYIT / BSc IT / BCom final-year students preparing for campus placements.

7. COST STRUCTURE

- Hosting and domain (free-tier to low cost)
- Keeping salary / skill / course data updated
- Development & maintenance (student team)
- Campus workshops and social media
- Future: AI/LLM API and email service

6. REVENUE STREAMS

- Freemium: core free; Premium (Rs 149/month) for unlimited resumes, templates, analytics.
- B2B: college licences (per student / year).
- Recruiter access to a verified, skill-scored candidate pool.
- CSR and skilling-programme grants (SDG 8).

CareerCompass AI gives guidance based on skills and indicative market data. Salaries vary by company and city.
